Education

Vellore Institute of Technology (VIT)

B.Tech in Computer Science and Engineering (Information Security)

Sept 2024 – July 2027

Vellore, Tamil Nadu

Experience

Software Developer Intern

July 2025 – Nov 2025

AIAT India

Hyderabad

- Monitored and maintained cloud-hosted environments using Linux and AWS services, ensuring smooth deployment workflows.
- Utilized Git for effective source code management while contributing to internal tool development in a team-based workflow.
- Designed and implemented web-based systems using React.js and Node.js, building responsive interfaces with Tailwind CSS.

IEEE-VIT Student Chapter

May 2024 – Present

Core Committee Member

Vellore, Tamil Nadu

- Engineered and launched a national-level conference platform using React.js and Tailwind CSS, improving performance by 30 percent and reaching 1,000+ participants.
- Facilitated team conflict resolution, enhancing collaboration and project continuity.
- Created posters and social media assets, increasing event visibility by 23 percent.
- Organized and executed multiple technical events to expand outreach and engagement.

Projects

Quantum-safe Image Signing System | React Native, FastAPI, Dilithium2

Sept 2025 – Oct 2025

- Built a quantum-safe image signing system using React Native frontend and FastAPI backend with the post-quantum Dilithium2 signature algorithm and liboqs Quantum safe Library for the core functionality.
- Implemented secure end-to-end workflows for signing and verification of images.

AI Agentic Knowledge-Base Service | Langchain, Chroma DB

Aug 2025 – Oct 2025

- Developed a knowledge-base agent powered by Retrieval-Augmented Generation (RAG) and long-context AI Embedding models.
- Implemented persistent vector storage and document chunking using Chroma DB.
- Enhanced retrieval accuracy by 40 percent in long-context reasoning tasks via late-chunking optimization.

Hybrid Encryption System | Python, Hashlib, Cryptography

Nov 2024 – Dec 2024

- Designed a two-layer encryption system for secure message encoding and decoding.
- Implemented hashing techniques to prevent leakage of sensitive information such as passwords.

Skills

Languages: Python, C++, Go, Shell, SQL, JavaScript,

Frameworks: React.js, Next.js, Node.js

Styling Libraries: Tailwind CSS, CSS

Softwares & Tools: Git, GitHub, VS Code, Postman, Jenkins CI/CD, Grafana, AWS, Google Cloud Platform, Linux, Vercel, WordPress

Achievements

Hackathons: Secured **2 First-Place wins** and participated in **10+ national-level hackathons**, consistently contributing to full-stack and AI-driven solutions.

Amazon ML School Hack 2025: Ranked among the **Top 40 teams in India** for developing an end-to-end Dynamic ML –based solution under competitive timed constraints.

CTFs: Participated in **5+ Capture the Flag competitions** and solved **100+ security challenges**, demonstrating strong skills in cryptography, and web exploitation.
